

Former Pupil Profile

Former pupil Grant Anderson (1997-2003) tells us about his further education, career and special memories from his seven years at Hamilton College.

Where are you now?

After studying Building Services Engineering and gaining an honours degree, I worked for Mitie Engineering for approximately five years as a project manager. Following that I signed for Hamilton Academicals, full time for one season, and I am now in my second season at Raith Rovers.

What lessons have you taken into your career?

Hamilton College prepared me well for examinations. Most things in life result in some sort of test in order for you to progress. The school and my family taught me how best to deal with these tests. The friendships I made at Hamilton College have stayed with me.

Do you have any special memories about the school?

Plenty! A lot of good laughs and treasured experiences. One of my highlights was playing in the Scottish Independent Schools cup final against George Watsons College and scoring a hat trick. I also would like to thank the kitchen staff, especially Liz, for providing great lunches and extra portions!
